

23

24 **Supplementary Figure S1.** Principle coordinate analysis (PCA) plot of the RFC selected line

25 and the control line based on allele frequencies of 11 Brown Tsaiya microsatellite markers. The

26 first (PC1), second (PC2) principal components account for 8.5% and 5.2% of the total variation,

27 respectively. S: RFC selected line; C: the control line.
