Asian-Australasian Journal of Animal Sciences

November 1999 Volume 12, Number 7

Contents

ANIMAL BREEDING AND GENETICS
142. Estimation of Genetic Variance and Covariance Components for Little Size and Little Weight in Danish Landrace Swine Using a Multivariate Mixed Model / C. D. Wang and C. Lee ................................. 1015

ANIMAL REPRODUCTION AND PHYSIOLOGY

RUMINANT NUTRITION AND FORAGE UTILIZATION
146. Effect of Nitrogen Fertilization and Stage of Maturity of Mottgrass (Pennisetum purpureum) on its Chemical Composition, Dry Matter Intake, Ruminal Characteristics and Digestibility in Buffalo Bulls / M. Sarwar and Mahr-un-Nisa ................................................................. 1035
147. Eating Behaviour, VFA Production, Passage Rate and Nutrient Digestibilities in Cattle Fed on Wheat Straw Supplemented with Different Levels of Berseem / A. Das and G. P. Singh ........................................ 1040
148. Synergistic Effect of Urea and Lime Treatment of Wheat Straw on Chemical Composition, In Sauco and In Vitro Digestibility / S. K. Sirohi and S. N. Rai ................................................................. 1049
149. Influence of Dry Roasting of Whole Faba Beans (Vicia faba) and Whole Lupin Seeds (Lupinus albus) on Rumen Disappearance and Estimated Intestinal Digestion of CP Using the Optimal Three-Step In Vitro Technique in Dairy Cows / P. Yu, A. R. Egan and B. J. Leary ............................................ 1054
150. The Effect of Different Sources of Urease Enzyme on the Nutritive Value of Wheat Straw Treated with Urea as a Source of Ammonia / M. J. Khan, J. R. Scaife and F. D. Hovell ............................................................... 1063
151. Possibilities of Utilizing Protected Hazelnut Kernel Oil Meal in Growing Ruminants and Dairy Cow Diets / B. Z. Saricicek ................................................................. 1070
NON-RUMINANT NUTRITION AND FEED PROCESSING

155. The Effect on the Lipid Metabolism of Tsaiya Ducks When High Levels of Choline or Methionine are Added to the Duck’s Diet / T. F. Lien and D. F. Jan

156. Porcine Somatotropin Improves the Efficiency of Digestible Protein Use for Protein Deposition by Growing Pigs / K. U. Lee, R. D. Boyd, R. E. Austic, D. A. Ross, D. H. Beermann and In K. Han

ANIMAL PRODUCTION AND APPLIED SCIENCE

159. The Adoption of Recommended Practices by Dairy Farmers in Southern Thailand / B. Srinoy, C. Chantalakhana, S. Saithanoo and K. Pattamarakha

REVIEW PAPERS

161. Recent Advances in Sheep Genome Mapping / A. M. Crawford

162. Recent Advance in the Relationship between Endocrine Status and Nutrition in Chickens / J. Okumura and K. Kita

163. The Status of Laboratory Animal Production and Visions in the 21st Century / K. Görtner

164. Long-Term Breeding Strategies for Genetic Improvement of Buffaloes in Developing Countries / C. Chantalakhana and P. Skunnun
